Lexus (AUS) GS

2JZ-GE/3 (97-05)

Remote alarm/central locking ▾

System operation

Type A

- Pressing lock button Fig102406.1 activates alarm and central locking.
- With double locking: Pressing lock button twice within 5 seconds activates double locking system.
- Indicators will flash once.
- Pressing unlock button Fig102406.2 deactivates alarm and central locking.
- Indicators will flash twice and interior lamps illuminate for 15 seconds.
- Some models (if programmed):
  - Holding key lock button Fig102406.1 longer than 3 seconds in depressed position closes windows and sunroof.
  - Holding key unlock button Fig102406.2 longer than 3 seconds in depressed position opens windows and sunroof.
- Pressing key boot/tailgate release button Fig102406.3 for 1 second activates boot/tailgate release.
- If vehicle unlocked and doors or boot/tailgate not opened within 30 seconds, locks are reactivated.

Note: Alarm/central locking functions can be altered.

- Interior movement sensors can be deactivated as detailed in owner's handbook.

Type B

- Pressing lock button Fig102406.1 activates alarm and central locking.
- With double locking: Pressing lock button twice within 5 seconds activates double locking system.
- Indicators will flash once.
- Pressing unlock button Fig102406.2 deactivates alarm and central locking.
- Indicators will flash twice and interior lamps illuminate for 15 seconds.
- Some models (if programmed):
  - Holding key lock button Fig102406.1 longer than 3 seconds in depressed position closes windows and sunroof.
  - Holding key unlock button Fig102406.2 longer than 3 seconds in depressed position opens windows and sunroof.
- If vehicle unlocked and doors or boot/tailgate not opened within 30 seconds, locks are reactivated.

Note: Alarm/central locking functions can be altered.

- Interior movement sensors can be deactivated as detailed in owner's handbook.
