REGISTRATION

05GYF–02
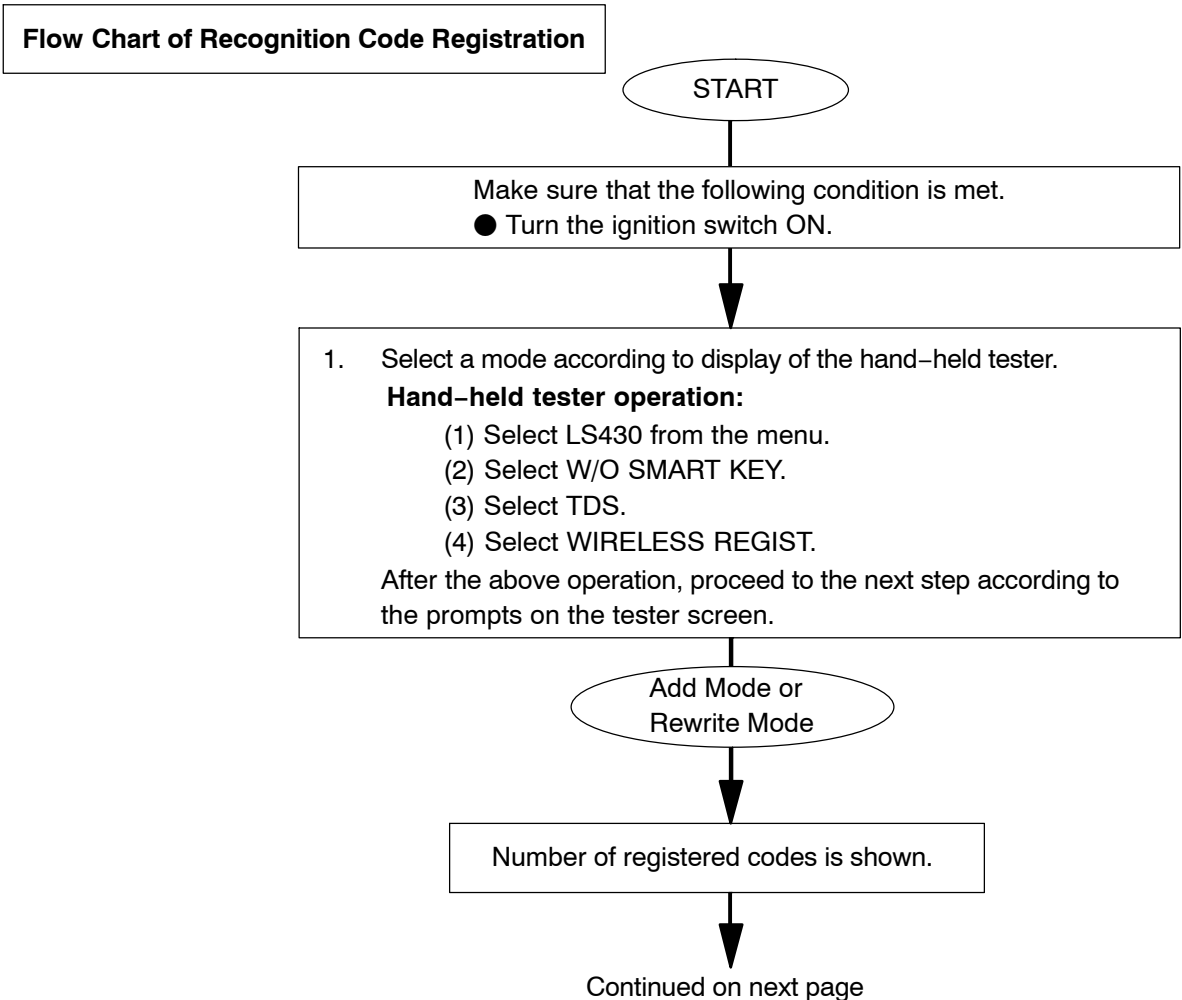

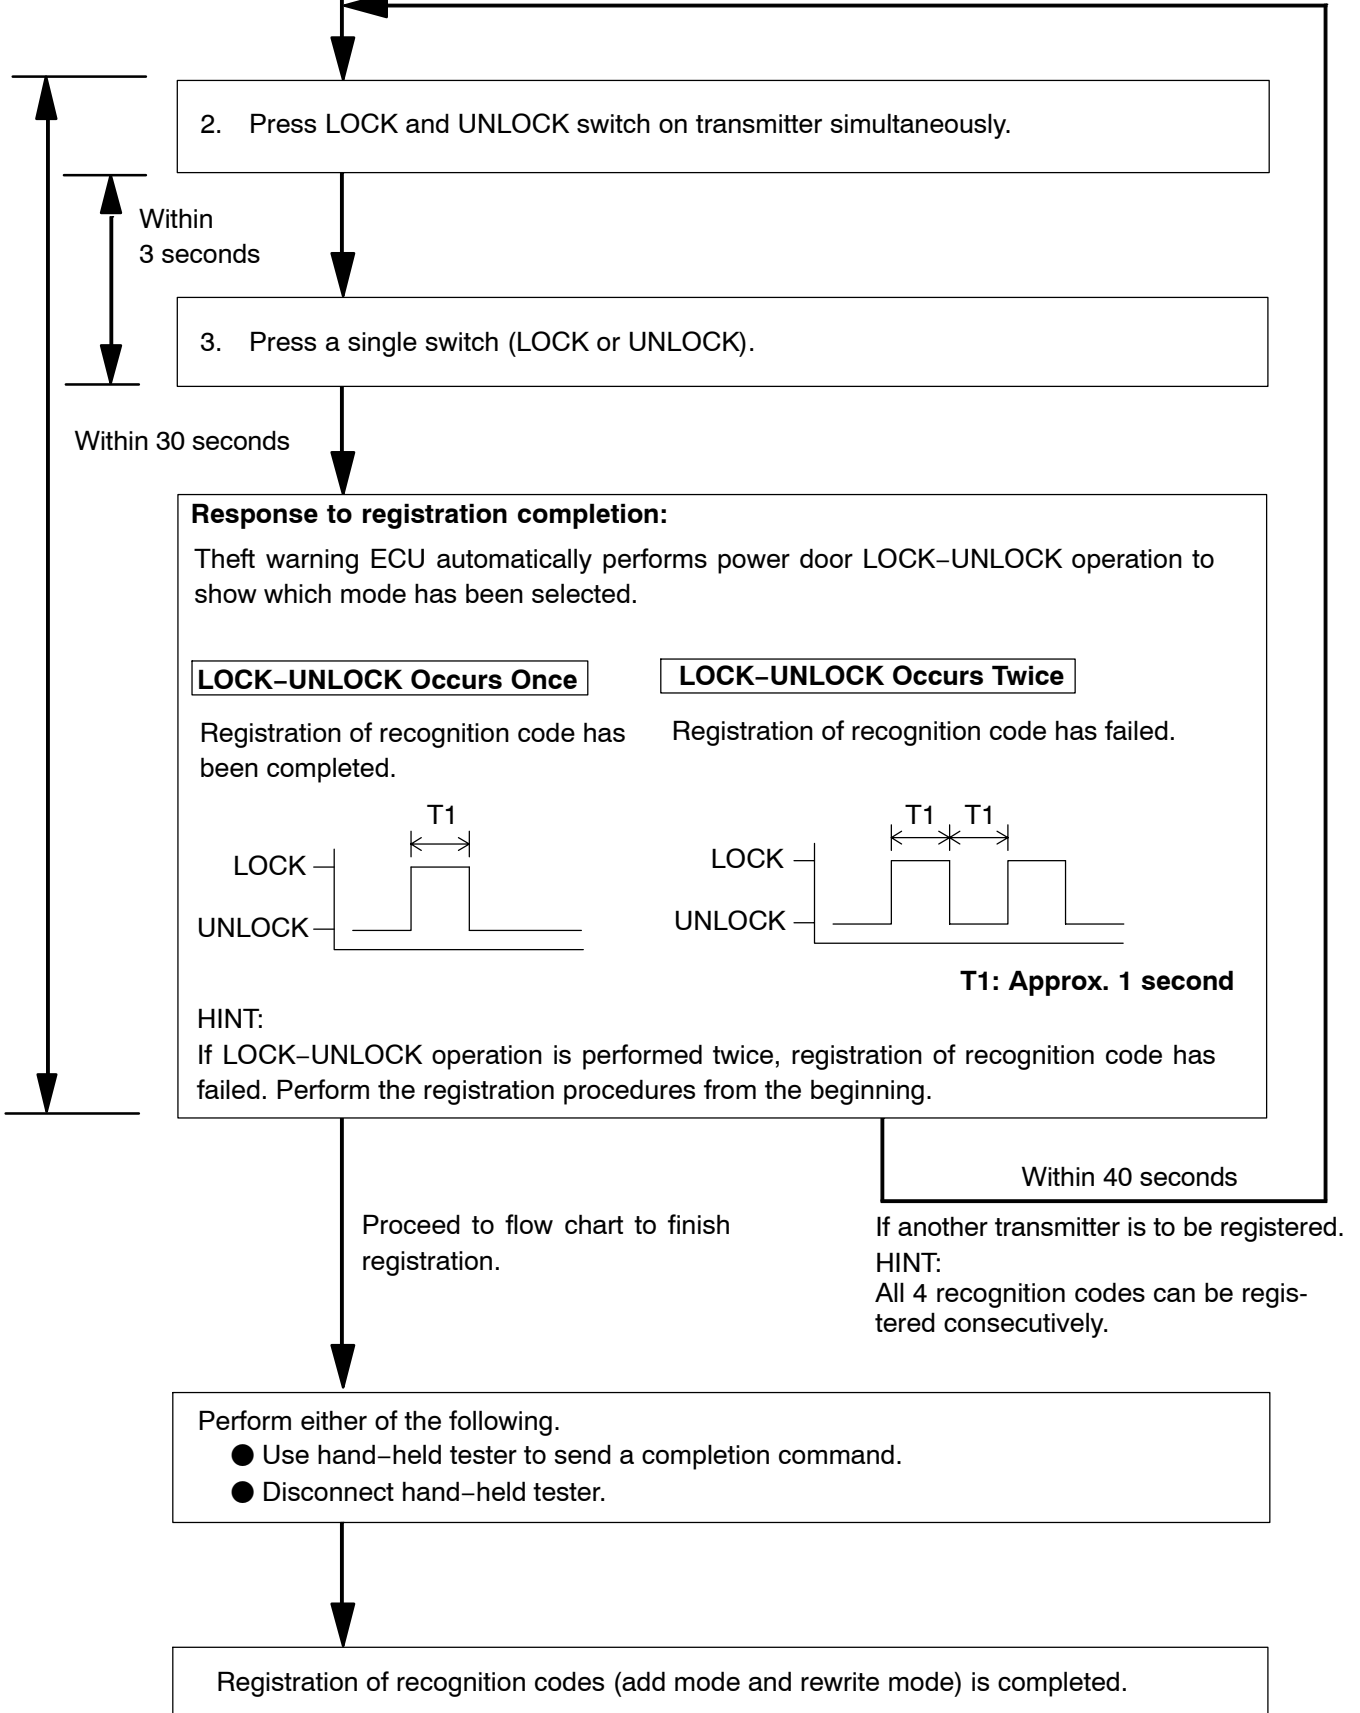

HINT:
- Recognition code registration is necessary when replacing the door control transmitter or the door control receiver. The key has 2 codes: the key code (immobilizer code) and wireless code. All of these code types need to be registered. Refer to page 05–3027 for the key code (immobilizer code) registration procedures.
- Add mode is used to register new recognition codes while still retaining codes already registered. This mode is used when a new transmitter is added. If the number of registered codes exceeds 4, the previously registered codes will be erased, starting from the first registered code.
- Rewrite mode is used to erase all the previously registered recognition codes in order to register all–new recognition codes. This mode is used when the transmitter or the door control receiver is replaced.
- Confirmation mode is used to confirm how many recognition codes have already been registered before another recognition code is registered.
- Prohibition mode is used to erase all the registered codes and disable the wireless door lock function. This mode is used when the transmitter is lost.
- All of the following registration procedures must be performed in order.

1.   **REGISTER RECOGNITION CODE**
      When using the hand–held tester

Flow Chart of Recognition Code Registration

START

Make sure that the following condition is met.
● Turn the ignition switch ON.

1.   Select a mode according to display of the hand–held tester.
      Hand–held tester operation:
            (1) Select LS430 from the menu.
            (2) Select W/O SMART KEY.
            (3) Select TDS.
            (4) Select WIRELESS REGIST.
      After the above operation, proceed to the next step according to the prompts on the tester screen.

Add Mode or
Rewrite Mode

Number of registered codes is shown.

HINT:
If LOCK–UNLOCK operation is performed twice, registration of recognition code has failed. Perform the registration procedures from the beginning.

Within 40 seconds

Proceed to flow chart to finish registration.

If another transmitter is to be registered.
HINT:
All 4 recognition codes can be registered consecutively.

Perform either of the following.
   ● Use hand–held tester to send a completion command.
   ● Disconnect hand–held tester.

Registration of recognition codes (add mode and rewrite mode) is completed.

2.   REGISTER RECOGNITION CODE
When not using the hand–held tester

Flow Chart of Recognition Code Registration

START

The following conditions should be met.
- No key in ignition key cylinder.
- Driver side door is opened (other doors are closed).
- Driver side door is unlocked.

| 1. | Insert key into ignition key cylinder, then pull it out. |

Within 5 seconds

| 2. | Insert key into ignition key cylinder, then pull it out. |

| 3. | Close and open driver side door twice. |

Within 40 seconds

| 4. | Insert key into ignition key cylinder, then pull it out. |

| 5. | Close and open driver side door twice. |

| 6. | Insert key into ignition switch and close all doors. |

Within 40 seconds
