

YOUR VEHICLE INTERIOR IS FREEZING

COLD

YOUR VEHICLE INTERIOR IS EXTREMELY

HOT

Now you can heat up or cool down your RX's interior
in advance simply by using your smartphone.

RES+ allows you to remotely control various functions of your RX conveniently from the palm of your hand—from heating or cooling your vehicle interior to locking and unlocking your doors, and more—all before you leave the comfort of your home, office or anywhere you might happen to be.

RES+
Remote Engine Starter+

RES+ for the RX

Your smartphone just got smarter and your life made a whole lot easier with the available RES+.^{1,2,3} Featuring an unlimited range⁴ and supporting up to four phones⁵ per vehicle, RES+ allows you the ultimate convenience of being able to remotely control a number of your vehicle's settings conveniently from the palm of your hand simply by using your smartphone.

COMFORT & CONTROL

- Wish you could get into a warm car during a cold winter day or into a cool car during a hot summer heat wave? No problem. Lexus RES+ allows you to start your engine from virtually anywhere.⁴ Starting your engine activates your pre-set or factory default climate control settings, as well as the vehicle's heated and ventilated front seats (if so equipped) so your vehicle will be ready and waiting with a more comfortable cabin and seat temperature. When you start your engine using Lexus RES+, you can also stop the engine remotely.

SAFETY

- Can't remember if you locked your car doors? No problem. The home screen on your RES+ displays the status of the doors as either LOCKED or UNLOCKED.²
- Worried about your car while it's parked in an unfamiliar area? No problem. RES+ will send you an email notification if your factory-installed theft-deterrent system is activated.

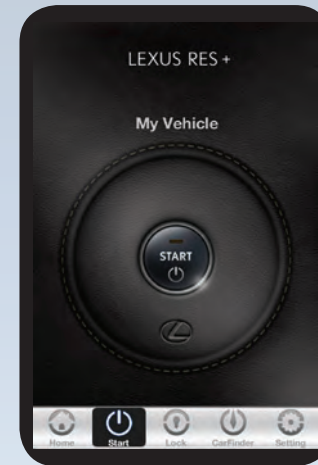

CONVENIENCE

- After just using RES+ to turn the engine on remotely, you can change your mind and shut the engine off. Wondering if the engine is indeed turned off? No problem. The home screen on your RES+ displays the status of the engine as either on or off.²

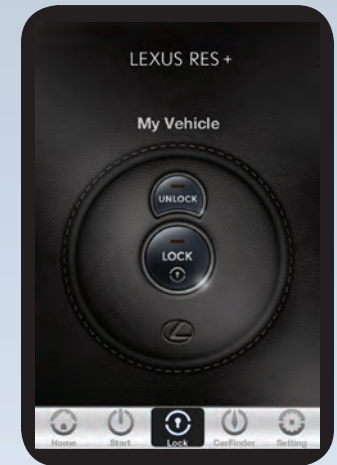

- Not sure if you should start your engine to activate your climate control settings in order to cool down or warm up your vehicle? No problem. The home screen displays the current outside temperature near your vehicle.
- Can't find your smartphone? No problem. With RES+ you can remotely start and stop your engine by using your Lexus SmartAccess fob as a convenient alternative.⁶
- Have more than one family member that would need access to your vehicle? No problem. RES+ supports up to four phones⁵ per vehicle.
- Your daughter has to get her school science project out of your locked car right this minute. Only problem is, your car is sitting in your driveway in California while you're in a conference room in New York. No problem. Lexus RES+ allows you to remotely lock or unlock² your vehicle doors from virtually anywhere.⁴ Furthermore, a message will be displayed to confirm the successful execution of the door lock/unlock command.

CARFINDER

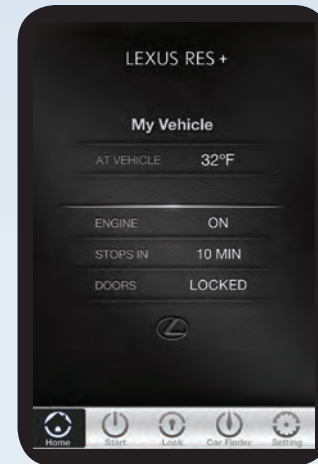

- Can't find your car amongst a sea of vehicles in the crowded open parking lot of a sporting event, shopping mall, airport or concert? No problem. Lexus RES+ includes a CarFinder feature, which utilizes "Augmented Reality" by combining the camera on your smartphone with GPS technology^{7,8} to help guide you back to your vehicle.

What you should know about the RES+

- Purchase and installation of the RES+ accessory in your vehicle is required.
- Requires registration on www.lexusdrivers.com, yearly subscription fee and smartphone app/download.
- Fully integrated with the vehicle's existing factory-installed theft-deterrent/keyless entry system.
- For more information, please visit www.lexusdrivers.com and click on the RES+ icon, or contact your Lexus dealer.

1. Purchase and installation of the RES+ accessory in your vehicle is required. To activate and use RES+ smartphone connected services requires registration, an annual subscription fee and app/download. **2.** For detailed functional restrictions and limitations go to www.lexusdrivers.com and click on the RES+ icon. Next, click on "Manual." Finally, under the heading "FOR SMARTPHONE OPERATION," click on "OPERATION PRIORITY OVERVIEW (PDF)" and "OPERATING CONDITIONS (PDF)." **3.** RES+ comes with a warranty that is honored at all Lexus dealerships nationwide for up to 48 months/50,000 miles. See your Lexus dealer for specific warranty details. **4.** The smartphone and vehicle must be in a location with adequate cellular coverage for proper performance. **5.** Phones supported include select iPhone® and Android™ models. iPhone is a registered trademark of Apple Inc. Android is a trademark of Google Inc. Phones not included. To check current Lexus vehicle and smartphone compatibility with RES+ go to www.lexusdrivers.com. Click on the RES+ icon and then the "Compatibility" tab. **6.** The SmartAccess fob can remotely start/stop the engine with a range limitation of approximately 80 feet. **7.** CarFinder may not work in a covered or underground garage. **8.** Objects and structures surrounding your vehicle and/or smartphone, such as tall buildings and roof structures, can block GPS signals and affect location accuracy.
