

INTRODUCING: DESTINATION SEARCH

Dear Albert,

We hope you are enjoying your Lexus vehicle and your Lexus Enform App Suite service.¹

We want to let you know that on August 20, we'll be replacing Bing with a new app called Destination Search on your App Suite. With Destination Search, you can find and save up-to-date points of interest, addresses, restaurants, shopping, entertainment venues and more.

Just follow these three easy steps to update your smartphone and multimedia system.

Note: In order to update your app, please make sure your phone's operating system is up to date with the latest version.

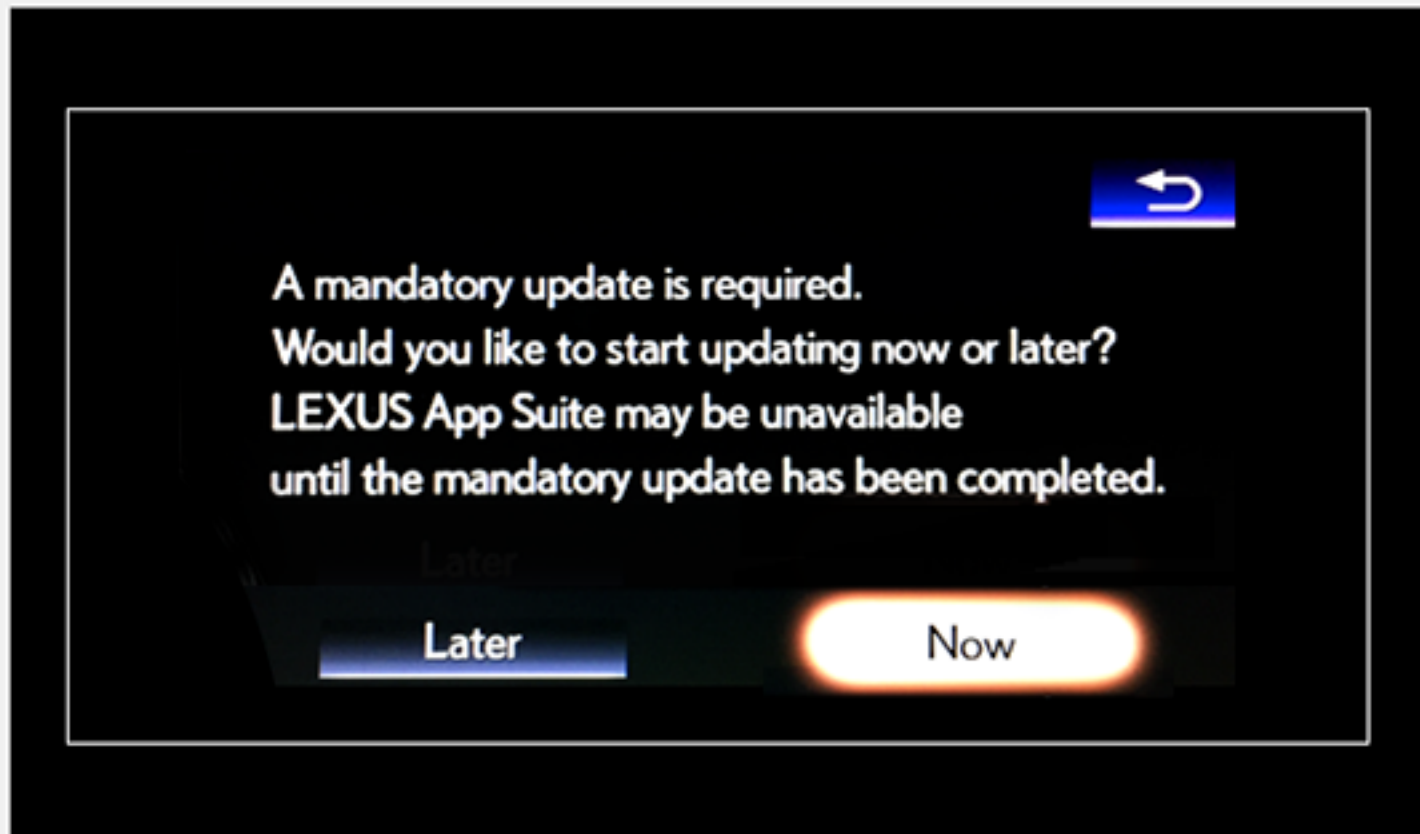

STEP 1: UPDATE YOUR PHONE

On or after August 20, accept the update to your Lexus Enform App Suite on your phone. This will update Bing with the new Destination Search app.

STEP 2: CONNECT YOUR PHONE TO THE MULTIMEDIA SYSTEM

The next time you connect your phone to the Lexus Enform App Suite in your vehicle, you will see a screen like the one pictured below prompting you to download a software update for the multimedia system.

In order to use Destination Search in your vehicle, the multimedia system software must be updated.

STEP 3: UPDATE YOUR MULTIMEDIA SYSTEM

Choose to perform the update now. If you choose "Later," you will be unable to use Destination Search on your multimedia system until the update is completed. This update will take approximately three minutes to complete.

When your update is completed, Destination Search allows you to:

- Search by address, category, and view search history.
- Search using voice recognition.
- View point-of-interest phone number and use the call button to connect directly to your destination.
- **NEW!** Sort search results by distance.
- **NEW!** Receive automated suggestions as you search on your smartphone, making it even easier to find what you're looking for.

We look forward to bringing you more exciting new additions to the Lexus Enform App Suite.

Sincerely,
Lexus Enform Customer Support

1. Providing your vehicle is equipped with Enform App Suite service.
