### System Selection Menu

Select desired system and then press the arrow button to access the ECU.

- System** Yellow = ECU status unknown.
- System** White = ECU communication OK.
- \*System** White w/Asterisk = ECU not supported or not responding.

All ECUs | Powertrain | Chassis | Body Electrical

Engine	ECT	Cruise Control	ABS/VSC/TRAC	Tire Pressure Monitor
Air Conditioner	Immobiliser	Theft Deterrent	SRS Airbag	Gateway
Body No.2	Body No.3	Body No.4	Body No.5	Driver Door
Passenger Door	Driver Seat	Passenger Seat	Retractable Hardtop	Tilt&Telescopic
Combination Meter	Combination Switch	Steering Pad Switch	AFS	Occupant Detection

Connect cable to OBD port, start Techstream software and then connect the USB end to the PC and tell it to Connect to the vehicle and you'll get this screen.

Error (S999-99)

**Error**

Error Code: 0x91020324

It's possible the requested function will work if you try again.  
If the problem persists please submit an error report using the F12 key.

This ECU monitors the tire

**Click on Tire Pressure Monitor here**  
**And then on the green arrow button here**  
**And then you may see this screen, if you do press OK anyway (it does it all the time for me but then I get the next screen anyway).**

## ID Registration (TPW-02-001)

Help

Welcome to the Tire ID Registration wizard.

This function will register Tire IDs for the Tire Pressure Warning system.

Note: Registration will fail if the time limit is exceeded for any step.

Warning: Registration will fail if the system is still in the process of initialization.

Press Next to proceed.

Next &gt;

Cancel

Signal Check

**This popup pops up. You must enter all of the codes in 5 minutes or you'll have to start all over again so have them ready. Click on the Next button.**

Receiver Assy or the Transmitter.

### Utility Selection Menu

ID Registration (TPW-02-002)

Help

Signal Check

#### Step 1 of 4

Choose a tire set to be registered.

- Main Set
- 2nd Set

Click on the circle (radio button) next to the set you want to program.

Once you do that, the Next button will be enabled and you can click it.

Help

Signal Check

## Step 3 of 4

### 2nd Set

After pressing Next, you will have 5 minutes to perform the following operation.

- Input each transmitter ID code.
- Press Next to input the next code.
- Continue until all codes are registered.

**They're really serious about the 5 minute warning thing 😊**  
**Click Next when you're ready.**

ID Registration (TPW-02-005)

Help

#### Step 4 of 4

Input the transmitter ID code.

ID code:

Input

Total Tires: 4

Registered Tires: 0

Time Remaining: 290 sec.

Press Next to input another ID code.

< Back

Next >

Cancel

Signal Check

Enter the code here.

It will start counting the Registered Tires here as you successfully enter it and keep track of the time you have left. If the code isn't good, it won't enable the Next button.

Once you've got this code entered, click Next.

Once you're done you'll get a success message (if I recall correctly).

ID4 Initial Threshold of Low-pressure	N/A	psi(gauge)
ID5 Initial Threshold of Low-pressure	N/A	psi(gauge)
Number of DTC	4	

And you should see goodness here. The 4 tires show whatever they last reported (you may need to hit the TPMS Reset button under the dash but I don't remember if I had to do that) and switch the glove box switch as well. On other cars like the LS600h it will take a 5<sup>th</sup> sensor for the spare & report on that one too. It's possible you can enter "5" in the original "Total Tires" field on page 9 but I don't always have one so don't have a TPMS sensor in it so I can't say for sure if that will work.
