

Setting up HttpWatch on iOS

- 1. Set your phone to Cellular Data Only (turn off Wifi as it catches less redirects, if any)
- 2. Navigate to the webpage in question

3) When a redirect occurs, go to the menu in the top right

4) And choose "Email" to email the capture

HWL - is a fast, c	ompact file format used	by HttpWatch
that includes all t	he data that is viewable	in HttpWatch.

5) Select "HWL" (HAR is only available in the Pro version) and tap "Next"

6) Send this email to <u>support@confiant.com</u> and make sure to include your organization's name along with any questions you'd like us to answer.
